**To Whom It May Concern:**

I am looking for a challenging and rewarding opportunity and have a sincere interest in securing a position with your organization. As my resume indicates, I have a competitive background, quality education and professional experience in the fields indicated to make a significant contribution to your current organization endeavors.

Although currently a Cloud Solution Architect, I'm a former systems administrator, enthusiast of cloud computing technologies, focused, results-oriented. I'm familiar with, and a huge supporter of the DevOps culture and how to make it work with a large team in a fast-paced environment. I have experienced working with technical communities as speaker in meetups and tech talks. I have a passion for technical writing and sharing knowledge.

I have extensive experience in Windows and Linux environments, opensource implementations, cloud computing (Azure and AWS), networking, fault tolerance mechanisms, high availability, security and performance, n-tier architectures, agile development methodologies and continuous delivery/integration, deep involvement in the full process life cycle, from conception and design to infrastructure implementation, instrumentation and testing.

A special passion for teaching, always willing to act as coach and help to develop subject matter experts in various technology specialty areas, collaborating with the increase of team performance. Easy-going person with good interpersonal skills that allow me to work directly with other teams and peers. Very interested in continuous learning, documentation of procedures, planning activities and continuous research about new tools and technologies.

Please accept this as a letter of interest for a personal meeting to discuss other facets of my background and how my knowledge and abilities would benefit your company. I am available to meet at your earliest convenience.

Thank you for your consideration. I look forward to your favorable response and meeting with you.

Sincerely,

Ricardo Macedo Martins
